

BUCKEYE LUBRICANTS #530SP SWISS CNC CUTTING OIL

Buckeye Lubricants #530SP Cutting Oil was originally introduced in 1994 as a cost effective alternative for expensive cutting oils used in Swiss Type Cutting Machines such as Citizens, Star, Hardinge, Tornos, Tsugami and others.

Over the past 5 years, #530SP has been further upgraded to reflect the newest technologies used on Swiss Machines while maintaining **low operating costs** when compared to competitive products.

As a result #530SP offers the following benefits:

- 1.) Higher speeds.
- 2.) Higher feeds.
- 3.) Increase in tool life.
- 4.) Minimized bearing wear due to it's ability to function as the machine lubricant.
- 5.) Can be used on all metals including stainless steel, hastalloy, titanium, and other exotic metals.
- 6.) Excellent heat dissipation properties.
- 7.) Clear, light yellow tinted color enabling operator to see their work.
- 8.) Enhanced operator acceptance due to it's mild odor, and tendency to eliminate dermatitis problems.
- 9.) Flash point over 300° Fahrenheit.
- 10.) Suitable for use in High Pressure Pump Systems.

SAMPLES PROVIDED ON REQUEST

Buckeye Lubricants #530SP is a SUPERIOR Cutting Oil
Suitable for ALL SWISS CNC Machines!!
