

BUCKEYE LUBRICANTS #600SP-MED SWISS CNC CUTTING FLUID

Buckeye Lubricants **#600SP-MED** is a synthetic Cutting Fluid that was originally introduced in 1994 as a cost effective, high performance alternative for expensive cutting oils used in Swiss Type CNC Machines such as Citizens, Star, Hardinge, Tornos, Tsugami and others.

Over the past few years, **#600SP-MED** has been further upgraded to reflect the newest technologies used on Swiss Machines while maintaining **low operating costs** when compared to competitive products. In addition, **#600SP-MED** contains no chlorine, sulfur, mercury or other objectionable material, making it suitable for **medical applications** and its base stock is approved by the FDA, NSF and USDA H-1 (indirect food contact).

As a result **#600SP-MED** offers the following benefits:

- 1.) Significant increases in speeds.
- 2.) Similar increases in feeds.
- 3.) Dramatic increases in tool life.
- 4.) Improved finishes.
- 5.) Minimized bearing wear due to it's ability to function as the machine lubricant.
- 6.) Can be used on all metals including stainless steel, hastalloy, titanium, and other exotic metals.
- 7.) Excellent heat dissipation properties.
- 8.) Clear, light yellow tinted color enabling operator to see their work.
- 9.) Enhanced operator acceptance due to it's mild odor, and tendency to eliminate dermatitis problems.
- 10.) Flash point over 400° Fahrenheit.
- 11.) Suitable for use in High Pressure Pump Systems.

SAMPLES PROVIDED ON REQUEST

Buckeye Lubricants **#600SP-MED** is a PREMIUM Synthetic Cutting Fluid
Suitable for ALL SWISS CNC Machines & ALL Metals!!
