

# BUCKEYE LUBRICANTS 888-61 SYNTHETIC CLEANER

**Buckeye Lubricants 888-61** was developed as a water soluble cleaner for a variety of applications. It is odorless and clear and is highly effective in removing dirt, grime, film residue and accumulated cake from parts, machines and coolant systems.

**Buckeye Lubricants 888-61** does an excellent job of cleaning parts and it can also be added to a machine or system, either with the existing coolant or after it has been removed, to provide superior cleaning during coolant changeovers. Regular use improves machine cleanliness and provides an optimal start for the fresh coolant.

**Buckeye Lubricants 888-61** is an excellent water softener for industrial applications and can be added to grinding coolants to prevent caking or packing of grinding residue, including glass, in coolant sumps. Typical use dilution is 20 parts water to 1 part **Buckeye 888-61**.

*SAMPLES PROVIDED ON REQUEST*
