

BUCKEYE LUBRICANTS #9 ALL-PURPOSE CUTTING OIL

Buckeye Lubricants #9 Cutting Oil was introduced as a lower cost effective alternative for Buckeye #530SP & #600SP Premium cutting fluids used in Swiss Type Cutting Machines such as Citizens, Star, Hardinge, Tornos, Tsugami and others. In addition, Buckeye #9 Cutting Oil provides outstanding performance in conventional screw machines, chuckers and related equipment.

Buckeye #9 Cutting Oil can be used on most metals, but it has proven to be particularly effective on aluminum. This product eliminates pick-up on the tooling, extending tool life dramatically, and it provides for extremely fine finishes.

While typically used 'as is' Buckeye #9 can be diluted with a light mineral oil or kerosene as required. It is a mild product, easy on the operators' hands, and it contains no chlorine or sulfur, making it suitable for those applications that cannot allow those ingredients.

In addition to conventional machining applications, Buckeye #9 has been effective on tapping and a variety of drawing and stamping operations.

SAMPLES PROVIDED ON REQUEST

Buckeye Lubricants #9 is an EXCELLENT Cutting Oil Suitable for ALL TYPES of Screw Machines & similar production equipment!!
