

# BUCKEYE LUBRICANTS #TLSG-25 SYNTHETIC COOLANT

Buckeye Lubricants #**TLSG-25** was developed to dramatically increase tool life on a variety of machining applications, using **carbide, HS steel** or **CBN tools**. It has proven to be particularly effective on materials that are difficult to machine such as **ALUMINUM, STAINLESS STEEL, INCONEL**, and **HASTALLOY**; as well as on abrasive metals including **CAST IRON** and **MALLEABLE IRON**.

Despite being a synthetic, #**TLSG-25** provides exceptional performance on **ALUMINUM** including the elimination of both staining on the parts and pick-up of metal on the tools.

#**TLSG-25** is also suitable for most grinding operations. It's clarity enables the operator to see the work being done, while providing excellent finishes to the metal without loading the wheel.

#**TLSG-25** is a **LOW FOAMING** product making it suitable for high turbulence applications. It is also **NON-GUMMING** and has excellent corrosion resistance. In addition, its' cooling and lubricating properties make it an excellent product for creep feed grinding.

*SAMPLES PROVIDED ON REQUEST*

Buckeye Lubricants #**TLSG-25** is a **SUPERIOR Synthetic Machining & Grinding Coolant** that is Suitable for **ALL Applications!!**
