

BUCKEYE LUBRICANTS

#4066 & #D-22 GRINDING OILS

Buckeye Lubricants **#4066 & #D-22 Grinding Oils** have been designed specifically to handle grinding operations but they are also suitable for many machining operations as well. Both products contain lubricity additives that provide excellent finish and wheel life without loading the wheel.

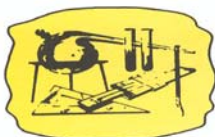

#4066 & #D-22 are non-foaming and suitable for most grinding operations including ID, OD, Form, Flute, Creep Feed and Centerless. In addition both products offer excellent operators' acceptance and Maximize grinding machine life.

#4066 contains active sulfur and chlorine making it suitable for more demanding applications while **#D-22** contains neither active sulfur or chlorine for applications where they cannot be used.
